About Decentralized Wastewater Treatment Solutions & Proper Sanitation

For human dignity and urban environmental protection
"Thinking Long Term - Acting Now"

Volume 3 | Issue 3 | Sept. 2010
A BORDA BNS Network Publication

The **DEWATS Newsletter**, published quarterly by BORDA in Bremen, constitutes a compilation of links to articles about DEWATS and sanitation from the BNS Network partners, posted on BORDA homepages from Southeast-Asia, South-Asia, Africa and Germany. The articles reflect actual aspects of current programme work.

The **BORDA BNS Network** is an international forum of organizations and institutions working to strengthen the dissemination of decentralized Basic Needs Services (BNS). It consists of organizations and institutions working together as partners with the Bremen Overseas Research and Development Association (BORDA) in development programmes in Africa and Asia. Their shared mission is to improve the livelihoods of disadvantaged groups within societies and to sustain the functioning of eco-systems by dissemination of demand oriented Basic Needs Services in the fields of decentralized wastewater treatment, sanitation, water and energy supply as well as solid waste management.

BORDA & BORDA BNS Network at the IFAT ENTSORGA 13.-17.09.2010

By *Sven Meyer, BORDA Germany, Sept. 03, 2010*

With more than 120,000 visitors from 170 countries the IFAT ENTSORGA is the world's most important fair for innovations, new developments and services in the fields of water, sewage, waste and raw materials management.

BORDA and the BNS Network partners are attending the IFAT ENTSORGA in order to meet decision makers of national and local authorities, planners, service providers and international donor organisations and inform about the advantages for Decentralized Wastewater Treatment Solutions (DEWATS) when it comes to providing access to improved sanitation for all.

The DEWATS approach and associated service packages were developed as a response to the gap between unsafe on-site latrines and sophisticated centralized systems in densely populated urban areas.

Meanwhile, DEWATS is filling the gap and is recognized by the International Water Association (IWA) and other international expert groups as „The Third Option“.

Two seminars were held: ...
